Profile

Motivated, adaptable and responsible professional currently studying about software development and machine learning. Experienced in various platforms and languages and passionate about discovering the latest technologies.

Employment History

Bookstore Assistant, One Distribution Company, Iasi, Romania

November 2021 — Present

Promoted positive communication and excellent service;
Organised marketing events;

Supervised and mentored junior team members;
Used problem-solving strategies to rectify difficulties quickly and effectively;
Reviewed and compared sales performance to meet desired targets.

Bartender, Jones Nightclubs LTD, Canterbury, Kent, UK

February 2019 — May 2021

Mixed drinks and served beverages for multiple guests simultaneously;
Maintained facility compliance with health codes, sanitation requirements and license regulations.

Education

Junior Programmer, IT Factory

August 2023 — March 2024

This 8 month course helped me start my journey in software development with a hands-on approach, working with trainers on different projects in Python.
It involved learning thoroughly about back-end development for 4 months, followed by an in-depth automated testing module using Selenium and Postman.

BSc Event Management, Canterbury Christ Church University, Canterbury, Kent, UK

September 2018 — May 2021

During university I learned about project management, marketing, accounting and research and data analysis, gaining business management, organisational and problem-solving skills through both a theoretical and practical approach.
